

Contact: resume.ijwfw@aleeas.com

Necessities I bring to the table:

- 5 Years of non-professional python experience, +2 years of rust
- Good problem-solving ability (See AOC 22-23)
- 5.0 GPA (last semester), 70-85 WPM Typing speed
- Modern development tech used (GitHub, git, bug tracking, Linux)
- Applying for CS Bachelors

Pluses:

- Developing website interfaces professionally
- Member of open source group code charity, with 800,000+ active users
- Used a Python Script to save \$110,000 USD for Client when working for Bright Power
- Daily driving Linux for 3 years, with experience in bash and zsh
- Good understanding of fundamentals like data structures and algorithms, Like Sets, Hashes, Trees, Nodes, Lists and linked lists and Multiple sorting algorithms etc.

Projects:

- Advent of code (2022 – Current) [🟢 Working on now]

Advent of code is a yearly programming Christmas themed challenge, My implementation has solutions for 46 of the challenges (23d), and is a large 2k+ line code base.

- PDF-analyzer (2022 – Current) [⚠️ Early-stage, unstable]

Early stage PDF extractor. This code base was used to save 110K-120K\$ in tax redemptions for clients while working for Bright Power. Mostly used to extract text from PDF's and then uses regex to autofind fields.

Portfolio:
